KCRO	7/18/2022	7/14/2022	Danielle O'Hearn	Grain Valley Jackson	Fugitive Particulate Matter	DS		

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between

July 16, 2022 and August 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50449 Concern Info Landowner is knowingly allowing erosion of land and destruction of land through continued atv use to the point of clouds of dirt being emitted into the air covering surrounding houses and properties. Severe health concerns are related to this for an 80+ year old neighbor and neighbor with heart surgery and those with allergies. The erosion is now becoming severe.								
Comments No violations were found at the time of investigation. Information on regulations was provided to the responsible party. ?								
KCRO	7/20/2022	7/18/2022	Terry or Mike Grisham	Warsaw Benton	Open Burning	CK		
Concern No. 50446 Concern Info From Webmail first notice on July 15, 2022 -- Strong chemical smell and acrid smoke. There was not much of a breeze so the smoke just settled into lower areas of the retreat. It caused your eyes to water and burn. This happens a few times every summer. Mike Grisham lives on a piece of land at the entrance to Doc's Retreat and he operates a burn pit. Most of the time it is just wood and brush, but he also burns old mattresses, pvc, and other stuff he picks up around the area. He has been asked repeatedly by his neighbors to please stop. There have been times the smoke is thick, black acrid, and it just settles over the lower areas making it hard to breathe								
Comments Violations of Missouri Open Burning regulations could not be confirmed during the investigation. Mike Grisham and his sister Kristen Alford were both provided with copies of the regulations in an email notification.								
KCRO	7/27/2022	7/25/2022	John Caswell	Lone Jack Jackson	Open Burning	DS		
Concern No. 50520 Concern Info Local fireman clearing brush to build houses and burning tires to burn brush. This has been going on all year. Active fire currently with heavy black smoke. Makes toxic fumes in house and neighborhood.								
Comments At this time, John Caswell has agreed to follow the open burning regulations and he now knows what the regulations are. If any violations are found in the future, enforcement may be taken.

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
July 16, 2022 and August 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 50597 **Concern Info** Caller reports a landscape company near his home burned a huge pile of railroad ties over the weekend. He had seen them piled up with cardboard and other debris thrown on top and had called the business on Friday to let them know that it was illegal to burn railroad ties, but then they went and burned them anyway. He says there is still some debris and more ties out there but thinks they may clean it up quickly since he had told them it was illegal.

The landscape company has been on this site approximately 6 months to a year and is leasing an old gas station property.

Comments A Letter of Warning has been issued to Over the Field Landscape, LLC, for burning of prohibited items, including railroad ties and trade waste.

KCRO	8/1/2022	Ron Hill	Turney Clinton	Open Burning	CK
------	----------	----------	----------------	--------------	----

Concern No. 50598 **Concern Info** The CP called to report that his neighbor, Ron Hill owner of Hill Top Tree Service just burned a gigantic pile of trade waste and other waste on Hill's property located at 5990 Northeast 292nd in Turney. CP stated that he had called up before regarding open burning issues at this location and a "Proposed Order and Judgment" had been issued after a DNR investigation about 3 years ago and the burning had stopped. But this weekend Ron Hill began burning again. CP said that he noticed a very large pile being burned and had actually called Ron Hill on Saturday and asked that he stop at that pile. Ron Hill told CP that he would and he was just getting that taken care of and he was done. He also mentioned that his wife had left him the previous week during that conversation and apparently upset about it. CP then said the following morning he to see that the very large pile of mainly trade waste (that has been building for the last three years) had been set on fire and burned throughout the night and was currently smoldering. The CP also reported that they were concerned that Ron Hill would bury the evidence prior to DNR being able to respond to investigate.

Comments

MISSOURI
DEPARTMENT OF
NATURAL RESOURCES

Division of Environmental Quality

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
July 16, 2022 and August 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50700			Concern Info Concerned party states that they are a neighbor to Charlie Owens and numerous times come out to vehicles in the morning and they will be covered with ash. Reports that this is an ongoing problem with Charlie burning what they assume to be large amounts of logs, trees and brush. For the last two weeks stated that they can't be outside after 7:45-8:00 pm due to the smell of wood burning and smelling like a fire pit. States that yard is covered with ashes (black ash & large pieces). Concerned that this will ruin the paint on their vehicles. Concerned party thinks that Charlie's tree trimming business is no longer active but he is allowing people to bring trash onto property to burn, possibly getting money for drugs. Charlie Owens may have a substance abuse problem.					
Comments	A Letter of Warning has been issued to Charlie's Tree Trimming & Removal for burning vegetation from a collection operation within 200 yards of a structure not owned by the party conducting the burning.?							
KCRO	8/3/2022	8/3/2022	Joseph Robb	Centerview Johnson	Open Burning	DS		
Concern No. 50621			Concern Info Owner of the land had a hole dug and pushed a trailer into the hole and burned it. The concerned party thinks that they are going to cover it up					
Comments	Joseph Robb was found to be in violation of Missouri Open Burning Regulations for open burning construction and demolition waste. Violations were corrected during the visit; he signed a violation acknowledgement and agreed to comply with the open burning regulation going forward. He will be issued a Letter of Unsatisfactory Findings.							
KCRO	8/4/2022	8/3/2022	Ford Motor Company - Kansas City Assembly Plant	Claycomo Clay	Odor	JH		

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between

July 16, 2022 and August 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 50646 **Concern Info** Air pollution including known pollutants as paint , emissions and rubber. Do not know other air pollutants, can't identify. Known land and water pollutants are oil, petroleum, paint. Can't identify other water and land pollutants at this time. Noise pollution from the train, vehicle transports, employee shuttles and excessive traffic on roads and including cutting through neighborhoods. Excessive heat from the plant and traffic. I have lived here 5 years and have gotten ill possibly from the pollutants. I am disabled and can't afford a physician to find out. The area neighborhoods can't sit outside or have windows open for fresh air because there is none. People have to run air conditioning or since I can't afford it I have to travel away from my home to get fresh air. My garden plants do not grow properly they are odd shaped and colored which may be from pollutants and which my son and I eat making me think maybe we are poisoning ourselves through the pollutants. I DO NOT ANSWER MY PHONE BUT CAN BE REACHED BY TEXT AT SAME PHONE NUMBER GIVEN BELOW OR E-MAIL

Comments The concerned party never responded to the request for more information. Insufficient information provided; no further action can be taken until needed information is provided to regional office staff.

KCRO	8/4/2022	8/4/2022	Stryten KCMO LLC	Kansas City Platte	Permitting	MC
------	----------	----------	------------------	-----------------------	------------	----

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
July 16, 2022 and August 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No.	50644	Concern Info	Stryten Energy - Formerly Exide Technologies - 7601 NW 107th Kansas City MO 64153 Site ID 1365-0043 ad Construction Permit 112016-002 The Operating Permit is not listed on the Missouri online database, it has also been mentioned that the site added a fourth punched grid line. The State may be behind updating the website due to COVID, however there is a concern that production equipment was added without proper air permitting, stack testing, modeling etc. impacting the local community - especially given the number of fires this site has experienced in the past year. Missouri Air Records should also be updated to reflect the change from Exide to Stryten for the Kansas City MO site and Element Resources from Exide for the Forest City MO Smelter.					
Comments	The facility's construction permits limit the emissions below the threshold levels requiring an operating permit. The fourth press was permitted in Construction Permit 112016-002A. A minor typo was found on the Department's website listing of issued air pollution permits; the permitting section was informed of the error. Kansas City Air Quality was informed of the allegation of frequent fires. The Missouri Emissions Inventory System (MoEIS) has already been updated with the correct facility names.						JH

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between July 16, 2022 and August 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 50656 **Concern Info** There is a business vehicle that idles on the street in our neighborhood daily for hours at a time. The driver is here every day, sometimes several times and generally for several hours at a time. When he is here he never turns the engine off despite the fact that he is generally here for a minimum of an hour or two in the early mornings but often he can be here for several hours when he returns later in the day and always with the engine running. On the weekends he often arrives around 7a and doesn't leave until the dinner hour with the engine running all day long. He doesn't live in our neighborhood but is here visiting with a resident when he is idling his vehicle. Some of my neighbors have asked him about it and he has told them that he can't turn the engine off due to the equipment in his vehicle. Apparently starting and stopping the engine is a problem. If this is true, there has to be a solution to him being here for hours on end running his engine and contributing to air pollution on our street.
It's a noise and pollution issue for us.
I'm sending you a picture of the back of his van along with pertinent information in hopes that you can look into this matter with the company.
The address he parks in front of daily is:

4319 Bryant Court
Independence, MO 64055

The company that owns the vehicle is: Tridentcare.com

Comments This van idling is not regulated

Concerns Investigated Between
July 16, 2022 and August 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 50703 **Concern Info** From MERLIN -- The caller contacted the duty officer to report that a contractor was not properly handling asbestos that was being removed from the house at the incident location. The caller stated that the contractor was throwing the asbestos material on the ground and it was not wrapped up with anything also the contractor was throwing the loose asbestos material into the dumpster. The duty officer referred the caller to the Department's Kansas City Regional Office.

Comments Slgle Family resident home which is exempt from the asbestos regulation. ?

KCRO	8/9/2022	8/9/2022	City of Blue Springs	Blue Springs Jackson	Odor	JS
------	----------	----------	----------------------	-------------------------	------	----

Concern No. 50705 **Concern Info** Caller has a sewer vent in his back yard. He says there has been an extremely bad smell for the past 5 days. Last week they put a new deodorant block in the vent, but still bad. He said they may not be adding the stuff they usually do at the lift station to get rid of the odor. It has been especially bad in the evenings. Blue Springs was supposed to put a carbon filter on the vent, but has not done so yet.

Comments No odor violations were observed during the investigation.

KCRO	8/11/2022	8/10/2022	Micah Charles	Clinton Henry	Open Burning	CK
------	-----------	-----------	---------------	------------------	--------------	----

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between

July 16, 2022 and August 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 50719 **Concern Info** The owner of the property located at 202 SE W Hwy, Clinton MO, 64735, burned down an abandoned double-wide trailer on the property. No asphalt shingles were observed, as it was a metal roof/siding, however it is possible carpet and treated wood from the flooring were burned

Comments Micah and Mackenzie Charles were found to be out of compliance with the Missouri Air Conservation Law and its implementing regulations based upon observations made during the inspection.? Demolition waste from a trailer home was disposed by open burning. A Letter of Warning (LOW) has been issued.

KCRO	8/12/2022	8/11/2022	Carol and Jim Bowe	Urich Henry	Open Burning	CK
------	-----------	-----------	--------------------	----------------	--------------	----

Concern No. 50721 **Concern Info** Caller says a neighbor tore down a huge old house approximately 2 month ago. For the last month they have been slowly burning everything they tore down. She says they are burning all of the house contents and they are only burning at night, although it is still smoldering this morning and most mornings. It is making her and other neighbors sick. They have had 1 dumpster on the site the whole time, but it is empty. She said they own another house next door that they are planning to do the same thing to. The city has told them they have to tear it down.

The former location of the house and where they are burning is at the corner of 4th and Locust. She said it is easily seen. the owners are Carol and Jim, but she doesn't know their last name. They are currently living in a trailer behind where they are burning. There is a big star on the trailer.

It is a very small town with a volunteer fire department, so neither the fire department nor city hall will do anything.

Comments A letter of warning has been issued to James Bowe or Bowe Realty for burning demolition waste. During the investigation, I observed active burning of wood waste from the demolished home located at 300 E Fourth Street in Urich.

KCRO	8/11/2022	Ideker Inc	Kansas City Jackson	Particulates

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 50722 **Concern Info** This location has frequent heavy smoke and particulate air emissions. These emissions sometimes settle back down to ground level in concentrations heavy enough to be visibly observed over 1/2 a mile away.

Comments ?This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the city of Kansas City Health Department's Air Quality Program. I spoke with Andrew Miller from the Kansas City Air Quality Program and he said that they would be visiting the site on 8/12/2022.

KCRO	8/11/2022	8/11/2022	Clay and Bailey MFG	Kansas City Jackson	Particulates	JH
------	-----------	-----------	---------------------	---------------------	--------------	----

Concern No. 50724 **Concern Info** Company had subcontractors come in for demo work on outside of building, removing a lot of brick and mortar. We are right next to the river and there is a huge cloud of pacm dust drifting over the river and across the entire plant.

Comments This was referred to the city of Kansas City, Mo Department of Health Air Quality Control

NERO	7/19/2022	7/13/2022	Boone	Columbia Boone	Fugitive Particulate Matter	SB
------	-----------	-----------	-------	----------------	-----------------------------	----

Concern No. 50578 **Concern Info** The dust is still very bad and not staying in the quarry. My cars , homes, and yards would verify my comments. The roads in the quarry need to be water down more than once during the day. Do you want me to take video's daily to prove my remarks? My car engine is white

Comments Found a violation of the fugitive dust rule. Dust was blowing off the property at the time of the investigation. Issue a Letter of Warning and require a response within 30 days.

Concern No. 50511 **Concern Info** CP states they are bringing in material and burning it. Burning tires at present time

Comments Jesse Evans, Environmental Specialist with the Southeast Regional Office, and I arrived at the location of the concern around 2:15 on 7/19/2022. We spoke with Warren Sansoucie, he informed us that he and his brother in-law burned tree trimming wastes that originated on the property. While burning these vegetative wastes the two men placed two tires on the fire as an accelerant. Warren Sansoucie informed us there are no more plans to burn anything else. He was receptive to the information we provided him which was "Facts on Open Burning Under Missouri Regulations - PUB 2047." From a distance we could not see any evidence of tires burned or any other prohibited materials in the burn pile although there was a pile of tires next to the burn pile. At this time there is no need for further investigation at this site. ?

SERO	7/18/2022	7/18/2022	Royal Oak Enterprise	Ellsinore Carter	Hazardous Air Pollutant Rele Fugitive Particulate Matter	HC		SE2200020

Concern No. 50457 **Concern Info** CP states that her kids can not play outside without having to come back in and take a shower, her car has soot all over it and the smell is stronger then it has been. You can visually see the smoke coming out of the plant. She has contacted them but no one will talk to her. They built there house 3 years ago and it wasn't that bad then. Her kids are sick more then they have ever been.

Comments An investigation was conducted on July 11, 2022 in response to an environmental concern regarding fugitive dust and a report of an exceedance by Royal Oak. This investigation was conducted by Hayden Cassinger and Jan Dunlap-Chronister. We began our investigation by observing kiln operations on the southernmost side of the facility during regular business hours. We performed this surveillance from the roadside and from inside the vehicle. While doing surveillance, we observed that there was dust and soot being disturbed by heavy equipment movement. These fugitive emissions were observed to be propelled high into the ambient air and across property boundaries. Visible emissions were also seen leaving the afterburner stack of kiln set 2. We took photographs of both of these violations. Next, we inspected the northernmost boundary of the facility property, to evaluate the location of the concerned party. It was noted that the properties adjoin each other with little buffer between them. While leaving from the northernmost property line, we were met by Brian Matt and Justin Rollin. They informed us that a concerned party contacted the facility by telephone on the morning of July 11th- Brian Matt and Justin Rollins informed us that the condition that was reported on the morning of July 11th was caused by low temperatures in the afterburner system of kiln set 2 and that the problem had already been fixed. To end our investigation, we made another observation on the southernmost boundary of the facility where we observed smoke escaping from multiple particulate matter fans on multiple kiln sets. Photographs were taken to document this violation.?

Concern No. 50477 **Concern Info** CP states the neighbor has a flue and there is a chemical burning smell sporadically late in the evening 10:00 pm to 1:00 am

Comments Open burning is defined (in Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements) as the burning of materials where the products of combustion are emitted into the air without passing through a chimney or stack. Therefore, this is not an instance of open burning and 10 CSR 10-6.045 is not applicable, since the CP stated that the neighbor has a flue (chimney). Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.165 Restriction of Emission of Odors applies to various commercial sources of air pollution. Both knowledge of this area of Ste. Genevieve County and an internet search using Google Maps suggests that this is a residence and not a business or other commercial operation. Therefore, 10 CSR 10-6.165 is also not applicable in this situation.
No violation of air regulations has occurred.

Concern No. 50527 **Concern Info** CP states there is someone burning something behind the Riggs building on the east side of town. CP states the smoke is thick and black.

Comments I arrived in the area of the concern at approximately 3:30 PM. The CP stated that the burning was coming from behind the old Riggs building. Upon my arrival to the Riggs building, I could see no active burning or evidence of a recent burn anywhere nearby. I stopped by Corrections Department - Probation located at 1441 Black River Industrial Park Road in Poplar Bluff and spoke with a woman inside who told me there was a lot of smoke earlier coming from down the road at the place with all the trucks. I continued down Barnhart Road until I got to the place with all the trucks. From the road, I could see what looked like something smoldering. There was some smoke, but not much. There were no trespassing signs on both entrances to the property.

As I started taking pictures of the smoke from the road, a car pulled up beside me and a gentleman named Allen McAtee began speaking with me. Mr. McAtee told me that he worked at this place and that his Dad, William McAtee, owned it. I gave Allen my business card and explained that we received an open burning concern earlier and that's why I was here. Allen told me that him and his Dad had cleaned up some vegetative waste from their home and brought it here and burned it. Allen told me he believed that it was strictly wood waste that was burned. Allen then gave me his Dad's phone number and also told me the name of the business, Renegade Transport.

I spoke with Mr. William McAtee on July 21, 2022 at 1:57 PM. I asked William the same things that I had asked his son. William told me that it was not vegetative waste, but was instead treated boards and fencing from their home that was brought to Renegade Transport and burned. William told me that there was a small junk pile on the property when they bought it roughly six years ago and that he just tossed the boards and fencing on top and started the fire. William informed me that after he noticed the excessive amounts of smoke, he immediately started dousing the fire with water and noticed very little tire wire toward the bottom of the pile which gave him the indication that there may have been a tire in the pile.

William told me that there was roughly 30-40 tires on their property that Raben Tire is supposed to come buy off of them. William also told me that there was nothing but ash and a few metal remnants from the fire. I suggested to William that he take the ash and metal to a transfer station or landfill to dispose of it. I also sent William some fact sheets/regulations so that he knows how to properly dispose of such waste in the future. I could get no photographs of the contents of the fire, just some smoke.

I was only able to get photographs of some smoldering smoke from the fire. William McAtee told me that only ashes and some metal remnants remained in the burn pile. I gave Mr. McAtee some fact sheets/regulations and suggested he take the ashes and metal to a transfer station or landfill to properly dispose of them.

Concern No. 50491 **Concern Info** CP states his neighbor doesn't have trash pickup and he burns his trash one or twice a week and is polluting the air

Comments received a phone call from Kenneth Tucker on July 19, 2022 at approximately 3:00 PM. Mr. Tucker explained that his neighbor, Kenneth Cuff, may call us with a concern of open burning. Mr. Tucker went on to explain exactly what he was doing with his open burning. Mr. Tucker lives in a home with four or fewer dwelling units and is strictly burning household trash. Given these reasons, Mr. Tucker is exempted from our open burning regulation.

I called Mr. Kenneth Cuff on July 21, 2022 at approximately 11:35 AM and explained to Mr. Cuff that given the details as to what exactly Mr. Tucker was burning, he was exempted from the open burning regulation. I explained to Mr. Cuff that there may be possible stricter city or county burning regulations that we don't enforce.

I emailed Mr. Tucker PUB2047 - Facts on Open Burning Under Missouri Regulations and Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements.

I mailed Mr. Cuff PUB2047 - Facts on Open Burning Under Missouri Regulations and Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements.

Concern No. 50512 **Concern Info** CP states individual is burning creosoted railroad ties in their yard. The fire department has been called twice in the past and the won't do anything about it.

Comments Michael Gentry, Gordonville fire chief and myself arrived at the site around 10:50. We examined the burn pile, which was smoking, but had not grown in size since the last visit on July 7, 2022. We spoke with two neighbors, who did not disclose their names, they confirmed they had not seen any new materials being added to the pile in recent days. The two neighbors did inform us that the fire had flared up again on July, 19, 2022, (they assumed that the fire had simply reignited on its own. We continued to the property and spoke with the property owner who did not disclose her name, but did inform us that Victor Marcial is her husband. I provide my credentials and introduced myself and Michael Gentry, Mrs. Marcial confirmed no additional materials have been added to the pile, but the fire did reignite on Tuesday the 19th of July. Mrs. Marcial has not picked up the certified letter addressed to the residence from the post office sent by the Department. I provided Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements, "Facts on Open Burning Under Missouri Regulations - PUB 2047" and a list of waste disposal companies, who may be able to help remove the waste. She was receptive of the information provided. The source of the concern has been making an effort to extinguish the fire to the best of their ability, according to Mrs. Marcial. ?

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 50698 **Concern Info** The individuals/business own a lot next to our home, the lot is vacant, but is used as a dumping ground. Items we've witnessed being dumped through the years include furniture, used housing materials, yard waste, etc. Once or twice a year they come down and burn the debris... sending soot, ashes, and a strong stench throughout the neighborhood. Several years my husband spoke with a county commissioner and was told there was nothing the county could do. Today, they started burning a little before noon. It is now 5:00 and they continue to burn. They told me it was okay as the fire department had been by. However, the soot and ashes are blowing all over and the smell (earlier today) was terribly acrid.

Comments At the time of my investigation, no open burning was taking place. The property was posted as For Sale By Owner call (573) 414-9875. I tried calling this number and left a couple of messages; but I did not receive a return call. I called the Stoddard County Assessor's Office and I was told that the property belonged to Richard Holland. I sent a copy of the regulation Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements, the fact sheet Facts on Open Burning Under Missouri Regulations, the fact sheet Managing Construction and Demolition Waste, and the fact sheet Management of Scrap Tires to the address of the property owner that I received from the Stoddard County Assessor's Office. I did not manage to find out the source of the waste materials located in an apparent burn at the site location described along McCormick Street in Dexter.

No violation of the Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements was observed.

Concern No. 50534 **Concern Info** E-mail: "There is a property in the town of West Alton and it has a continuous fire going. This property to my knowledge was purchased by a gentleman that operates a tree removal business. He is burning large tree stumps and dump truck loads of wood chips. This has been causing issues for all the residents that live near the property and as far as my home. It has been increasingly worse when the air is dense and humid, it makes it to where we cannot come out of our house.

The struggle is, our city does not have an ordinance that would limit his burning. The solution that was suggested, we call the fire department and have it put out every time he lights the fire. The downside of that is it is exhausting resources that we are already limited on. My question to you is, do you know of any restrictions or laws from an air quality standpoint that could help us? To be honest, most of the towns people wouldn't mind if the fire was once or twice a week but the fact that it is non-stop really is getting old. I wasn't sure if you knew of another avenue that we could present to the city to help with this but I wanted to reach out and see.

As always, I appreciate your time and guidance.

Thank you,

Michelle"

Comments Responded to email 7/19/22:

Hi Michelle,

I was forwarded your question regarding open burning practices in West Alton. I'm the air pollution supervisor for the Missouri Department of Natural Resources, St. Louis Regional Office.

The burning you describe would be against Missouri's Open Burning Regulations, since it is located in St. Charles County, an ozone non-attainment area, and we're currently in ozone season (until September 15th). This means that until September 15th, they would be required to use an Air Curtain Incinerator when burning vegetative waste that originated off-site.

Outside of ozone season, they still would have several conditions they would need to follow – the burning must take place at least 200 yards from the nearest occupied property (not owned by the party conducting the burning), the burning must take place between sunrise and sunset, the burning must be supervised at all times, and the fire department would need to be notified.

If the fire department has been out recently, we could use their incident report to issue a violation. We could also investigate the open burning ourselves

I've attached a fact sheet on open burning, as well as the full open burning rule (since the fact sheet does not mention the ozone non-attainment requirements). Feel free to pass this information along to the party conducting the burning – I'd also be happy to speak with them. Our first course of

action is usually to supply this information, since many are not aware of the requirements. If it continues to happen, then we can work to document a violation.

Please let me know if you have any questions. Thank you,"

Received response later that day:

Hello David,

I appreciate your quick response and information you provided. I will forward this information to the city officials and to the Fire Department for reference

The City of West Alton will be adding this information to the first formal notice that they will be mailing to the individual. I am hopeful this information will be enough to discontinue the burning in the future and no additional action will be needed. I agree, most are probably not aware of the requirements for burning.

Thank you for your time,

Michelle?"

Concern No. 50535 **Concern Info** E-mail: "Good Evening
My name is Leslie Limberg. I am a Missouri Master Naturalist & St Charles County Parks volunteer - both since 2005. Since a youngster I have hunted with my Dad and respected all things nature. I own & care for a 5 acre old growth forest near Wentzville, Missouri for 25 years. Currently I manage a farmers market in New Melle.
Two weeks ago a family moved in across the street. I spoke with the new owner named Joe, who said many of his trees have lichen on the bark & are diseased and must be removed. Respectfully I mentioned that lichen is a natural algae/moss that naturally occurs in our old oak-hickory hardwoods. Apparently he was listening to some loggers who have since cut down 80 of his trees. It's a mess as you can imagine with exposed soil, branches hanging dried & brown, limbs & trunks piled up 15 feet. 30 foot trunks on trailers.
Okay, so I am concerned for his inexperience & his setting fire to the brush piles & old tree trunks. The local fire department a mile away no longer sets our rules and permits. They have referred me to you. I know we can call 911 if need be. I will be speaking with the neighbor shortly to determine his intentions. As this could be a long conversation, I plan on telephoning you tomorrow, Wednesday to clarify some things. Hopefully this email will be read soon by an advisor who can answer my questions.
Sincerely,
Leslie Limberg
102 Red Fern Lane
Wentzville, Mo. 63385
636-398-8809"

Comments ??/20/22 I called the concerned party and left a voicemail. I explained that in this situation, if all of the materials being burned are vegetative waste originating from the same property where burning is taking place, then we did not have any regulations to enforce. I explained that we had stricter rules for collection centers, etc., but that burning vegetative waste on your own property does not require a permit or have any special conditions. I explained that we would highly recommend they speak with the fire department and take measures to control the burning to prevent it from spreading. I offered to speak more to the concerned party if they had any questions.

Comments Referred to St. Louis County APCP. Aaron Cadman investigated the concern and provided this update:

"Hi Myron,

I conducted a site investigation today between approximately 11:15am-12:15pm. This property was formerly owned by Resurrection Cemetery and is being developed as a new residential community. I did not observe a violation of 10 CSR 10-6.170 during the investigation. Dust was being created by vehicular activity, earth moving equipment, and a (possibly unpermitted) portable crusher/grinder that was processing earthen material. Dust was not observed to be crossing property boundaries. I also observed what appeared to be track-out of earthen material onto MacKenzie Road/State Route P which was occasionally being rendered airborne by passing vehicular activity.

I spoke with a representative of McKelvey Homes, one of the home builders involved with the project, and they confirmed that Kolb Grading, LLC of Weldon Spring, MO is conducting the earth moving and site prep activity. I expressed my concerns to the McKelvey Homes rep about the potential for dust to leave the property boundaries and the track-out of material onto MacKenzie Road/State Route P combined with the extremely dry conditions the area is experiencing. She took notes and stated she would relay my concerns to the project manager.

While I was there I observed water being applied to the haul roads on at least one occasion. I spoke with a resident (not the complainant) who lives on Hurstgreen Ln which backs up to the development site. She stated that they typically only water about once a day and that she has experienced dusty conditions in the past. I gave her my card and she said she would let us (St. Louis County APCP) know if she sees dust migrating across the property boundary.

The attached image shows the visible emissions being emitted from the portable crusher/grinder operation. With a closer look you can see the plume rising front of the communications tower. Under different weather conditions this plume could cross property boundaries.

I will reach out to the original complainant about the investigation. St. Louis County APCP will investigate further if we receive additional citizen concerns

Let me know if you have any questions or need any additional information.?

Thanks,

Concern No. 50691 **Concern Info** EPA Online form: "Developer uses a street sweeper in a residential neighborhood causing large volume of dust containing concrete, limestone, and various organic material, have ask them to stop several times over the past year"

Comments Our office has investigated this concern several times in the past and have not found any violations. I called Larry on 8/3/22 and explained that the EP forwarded his concern to our department. I asked when and where the attached photos were taken and told him that I would contact Lombardo and Fischer Homes to see what caused the dust and what can be done. I emailed Connor Mercer at Fischer Homes (cmercer@fischerhomes.com) and Doug Nance with Lombardo Homes (dhance@lombardohomes.com).

Connor with Fischer Homes responded that he reviewed the photos and they appear to be Lombardo trucks. He said he verified that his street sweepers were using water. Later that day, I received a call from Doug Nance. He said that he verified that the street sweepers were using water, but that he told his contractor to use more. I agreed that more water was necessary especially on dry days, or when the operator notices a large amount of dust. Doug forwarded this e-mail he received from his street sweeper contractor:

"Received pictures we will continue to run as much water as we can and try to help knock down some of the dust we're working as hard as we can using about 200 gallons of water each stop.

If you have any questions please contact me directly at 314-737-1413

Thank you,

Nick Giordano

CleanPro "

I e-mailed Larry and told him that I spoke with both developers and that more water will be used. With the large amount of rain we received 8/3/22 and 8/4/22, it is unlikely that we would see a dust violation any time soon.

Concern No. 50836 **Concern Info** 0A9ug2022:
SLRO Received the following complaint from EPA tip line:
"Mr. Micheals I burn in this dried up pond right across from my home he has burnt tires alot an is still burning them a pile of scrapge of sorts including tires. he does not respect the land or us for he shot my dog an it dont do anything wrong. He chokes us out with the things he burn an he puts his mules in the field where there is a natural spring an he dont even keep his calves or cows from tromping through the creek. He comes on my property an he has damanged my land an it the black an the fumes of what he burns hurts me. I just got diagnosed with lung cancer an this man burns everything. Things that should be dumped else where he burns he has a pile of tires . now as we speak he is getting readying to burn. Please stop this man before he destorys an pollutes any mire. TY" (See Attached EPA Email)

Comments 09Aug22-Myron Lewis looked up address on Google maps and attached a view of property to concern.?

08/09- SEL, sent two emails to the email address provided, and both were undeliverable. Called the phone number and was unable to reach anyone, nor was there a voicemail to leave a message

08/10- SEL, I called Becca, and was able to reach another individual who lives at Becca's residence and also is concerned about the issue. The individual did not give me their name. The CP stated that Mr. Micheals has a dried and empty pond on his property which he allegedly fills with various scrap, such as appliances, furniture, and tires. Once this pond has become quite full, Mr. Michaels allegedly disposes of the scrap through open burning. The CP stated this fire becomes quite large and produces a large plume of black smoke with a smell.

The CP stated that Mr. Michaels last burned around 3-4 months ago, and they believe he will burn again soon. The CP stated that Mr. Michaels repeatedly burns every few months. Due to a recent diagnosis of lung cancer of Becca, the CP has a heightened concern regarding this burning and the health of the members of the residence.

After asking, the CP stated that there is no fire department in the area that they could contact when the burns take place. The CP stated that they have tried to talk to Mr. Michaels about the issue and he has become aggressive and borderline violent. At this time, I stated that the next action of SLRO would be to send a letter and fact sheets regarding open burning to Mr. Michaels. I also told the CP that if Mr. Michaels begins burning again, to contact SLRO to notify us of the activity. ?

Concern No. 50883 **Concern Info** The Caller States:"

My name is Rick Garcia. My home is located at 6627 Ashbury Drive, Afton MO, 63123. Mckevley and Fischer Homes are constructing seperate residential developments, both called "The Preserves", near my home at the corner of 1230 McKenzie Rd Afton MO. They are using earth moving equipment to excavate the site. My neighbors and I have experienced health issues from exposure to airborne dust caused by this operation. Neighbors have experienced dry and burning eyes, dry throat, nasal congestion, coughing and skin irritation. We have observed signs that dust is making its way into Mckevley Creek, which is near the construction site. St. CO DPH, Aaron Cadman, investigated a couple of weeks ago. My number is 314-630-1868.

A Concern was received in our office:

The development is "The Preserve" and the issue is clay dust covering my neighborhood. Our cars are covered in a clay dust, our houses and decks and patios are covered in clay dust, and today as it has happened over the passed 6 months or so there are days we cannot go outdoors on our own property because of dust in the air. Why do we have to be inconvenienced and possibly harmed by this for profit development? I am a capitalist and understand profit margins, but not at the expense of others.

Comments	Myron 08/15/22: Looked up site on Google Maps Miranda 8/16/22: Rainy day, not suitable conditions to access the concern, however I called Rick Garcia and told him I was assigned the concern and wrote down some more information he had. Later in the afternoon I drove around "The Preserves" and the Ashbury neighborhood to make initial observations. I saw quite a bit of track out on the roads outside the construction site but no fugitive dust. Miranda 8/18/22 : Took a look at previous concern received about the development (from Rick Garcia) back in July, since the concern is taking place in STL county it was referred to STL County Air Pollution Program. Specifically to Aaron Cadman (contact information can be found in notes below). Those observations seem to match my initial observations. Aaron Cadman's finding can be found below in attachment "2022.07.21 The Preserves by McKelvey Homes CONCERN 189.pdf" Spoke to Aaron on the phone and got recommendations for vantage points. He also mentioned what areas he noticed had the highest volume of dust. Will keep that in mind when I go back out to the area. Miranda 8/19/22: Observed different locations of "The Preserves" from about 8:20-8:50am at different points next to the retention pond in the back of Resurrection Cemetery. Dump trucks were kicking up some dust, that was most noticeable at the front of the property closest to MacKenzie Road, however the dust did not leave the property boundary. I also did not notice any machinery being used that generated dust. The track-out that I noticed from Tuesday the 16th seemed to be much improved. It was rather early when I went to investigate this concern, it appears that traffic on the haul road was not at its peak. I will try to go back out to the location one more time next week in the afternoon. Miranda 8/24/22: Once again, I observed different locations of "The Preserves" from about 9:50-10:20am at different points next to the retention pond in the back of Resurrection Cemetery. I saw dust from dump trucks, front end loaders, and excavators. None of this dust left the property. There was no track-out today. I also drove around the neighborhood of Ashbury and saw no dust entering the area nor was there visible dust settled on fire hydrants other stationary items.

Concern No. 50495			Concern Info Burning fiberglass boats. Has been cutting boat into pieces and then purning the pieces over time. Caller claims you can smell it over a mile away and is causing throat irritation.					
Comments	SharePoint #2189 Violation 10 CSR 10-6.045							
			On July 21, 2022 the department received an environmental concern in regards to the open burning of construction wastes and fiberglass boats. On July 22, 2022 I arrived on site to the area of concern at 15265 State Highway P in Gravois Mills 65037. From my view on White Oak Road I was able to observe a burn pile with visible evidence of burned fiberglass and foam, at the time of investigation this pile was still smoldering. I then approached the home and came in contact with Jackson Bonnell where I introduced myself, provided credentials, and explained the reason for the visit. Bonnell informed me that his younger brother, Jay Bonnell, was responsible for the fire and had burned various materials over the last few months. Bonnell then invited me onto the property where we viewed the burn pile in greater detail. While further examining the burn pile, I observed the burning of fiberglass, foam, and durable goods. I informed Bonnell that this is a violation of Missouri open burning laws, that all illegal open burning must end, and that a letter of warning would be issued based upon the observations made. I then left Jackson with fact sheets and regulations pertaining to open burning, ending my investigation?

?I arrived to the area of 88 Anglers Bend Lane Galena, 65656 on August 25, 2022 and did a cursory review of the area and noticed several burn area on several properties. From the roadway I was able to confirm that only household and kitchen waste is being burned. I then located the property of concern and was not able to make contact with the landowner. From the driveway and public roadway I was able to observe burn piles in the front yard drainage ditch, these piles appear to be older as vegetation has been to grow over. No regulated materials were identified in this pile. Since I was unable to make contact with the landowners, I left the fact sheet and regulations that pertain to open burning and requested they give me a call. ?
